

THE YOZI HIERARCHY OF MALFEAS

Format

The format for the following summaries is simple. The name of the Yozi is indicated in **bold face**. This is followed by the names of the Unquestionable (Third Circle Demons) that make up their souls in *italics*, starting with the Fetich (central soul) of the Yozi when this is known.

Under the names of the Unquestionables are given the names of the souls that make up the Second Circle of Demons — each Unquestionable has seven souls (protecting, gratifying, defining, communicating, expressive, reflective and understanding). The Second Circles are given in that order, by role.

Finally, the names of the known First Circle progeny of each Second Circle are given in parentheses after each of the Second Circle entries.

Because there have been mentions of demons in supplements other than Games of Divinity that did not include their place in this hierarchy, I have taken the liberty of placing some of them. In some instances, I created new demons above them to help fill things out. All of these non-canon additions are marked with an asterix.
